Important information.

Check with your local Kalmar team to make sure your Kalmar equipment can use HVO100 and if it needs a minor upgrade before you start using HVO100. HVO100 is manufactured to the EN15940 Standard in Europe, if HVO100 is available in your market please check that it complies with your local manufacturing standards. HVO100 cannot be substituted for by other Biofuels that are not regulated or have been approved by the engine manufacturer. Use of Biofuels that have not been certified or approved for usage by the OEM should not be used.
